Control Tower Operations & Program Management Intern

Duration: 6 months
Location: Bengaluru

Role Overview

The intern will support the day-to-day operating rhythm of Duroflex's Control Tower, working with multiple functions to track fulfilment exceptions from identification to closure.

The role is suited for someone who enjoys execution, stakeholder coordination and solving operational problems in a fast-moving environment.

Key Responsibilities

- Track breached and at-risk customer orders and follow up on agreed actions.
- Coordinate with Supply Chain, CRM and other functional teams for status updates and closure.
- Maintain exception trackers, ageing and action-owner visibility.
- Follow up frequently with mid-level stakeholders on pending actions.
- Support implementation of SOPs and escalation mechanisms for recurring exceptions.
- Identify gaps in existing processes and help improve the Control Tower operating rhythm.
- Support daily reviews and preparation of action-oriented updates.

What We Are Looking For

- Strong ownership and follow-through.
- Comfortable coordinating with multiple stakeholders and following up frequently.
- Good communication and organizational skills.
- Basic proficiency in **Excel; Pivot Table proficiency is mandatory**.
- Ability to work in a structured manner despite changing operational priorities.
- Interest in operations, supply chain, program management or business strategy.

What You Will Get

- Hands-on exposure to running a cross-functional Control Tower.
- Experience in program management, supply-chain operations and stakeholder management.
- Opportunity to help design processes and SOPs, not merely execute existing ones.
- Exposure to real operational decisions and customer-impacting problems.
